## EXPERIENCE

### **ANALYTIC, Full Stack Developer** — April 2022 - November 2023

Full Stack developer leader, leading important projects for big Peruvian companies as Mall Aventura.

- Demonstrates a track record of successful projects, including the development of a custom module integrating HUBSPOT forms with Next.js 13, optimizing data collection and enhancing lead generation capabilities. Prioritizes scalability and easy maintenance for future-proofing websites and facilitating seamless updates and improvements.
- Expertly utilizes Next.js 13 and SvelteKit frameworks to craft static websites, including captivating animations with the GSAP library, delivering visually stunning and impactful user experiences across diverse devices.
- Proficiently leverages advanced skills in React, Next, and JavaScript to tackle complex challenges, ensuring innovative and creative contributions to front-end development projects.

### **WORKANA, Freelancer** — April 2022 - Present

FullStack developer creating innovative and creative solutions based on client requirements.

- Showcased strong analytical and problem-solving skills through the development and implementation of algorithmic solutions, addressing specific problem-solving tasks with precision and expertise.
- Specializes in Front-end development, with proficiency in WordPress, CSS, and HTML, crafting visually appealing and user-friendly websites that prioritize a seamless user experience.
- Demonstrated a commitment to long-term code quality by applying best coding practices, ensuring the production of sustainable and maintainable code for Front-end development projects.
- Proven ability to effectively communicate with clients, adept at understanding their requirements and translating them into actionable development plans, fostering successful collaborations.
- Prioritized the structuring of websites for scalability, ease of maintenance, and long-term sustainability, incorporating strategies for future-proofing projects and enabling seamless updates and improvements.

### **NO COUNTRY, Full Stack Developer** — May 2022 - March 2023

Working in a developer team (+10 members) to build a course platform and video game platform

- Proficiently utilized Next.js 13 and Tailwind, while embracing diverse technologies suggested by team members, cultivating a versatile skill set adaptable to various project needs.
- Successfully developed multiple projects, including an Online Courses platform and a Video Games platform, showcasing the ability to excel in diverse project environments and deliver impactful results.
- Collaborated closely with a development team and under leadership management, collectively addressing challenges and contributing to the overall success of each project.
- Gained valuable experience in multicultural collaboration, fostering effective communication and teamwork by interacting with individuals from diverse backgrounds and cultures.
- Achieved consistent success in project approvals, underscoring a commitment to high-quality deliverables and effective project management within a collaborative team setting.
